# VERICUT Interface to Zoller TMS Tool Management Solutions

Import tool geometry stored in Zoller TMS Tool Management Solutions directly to VERICUT
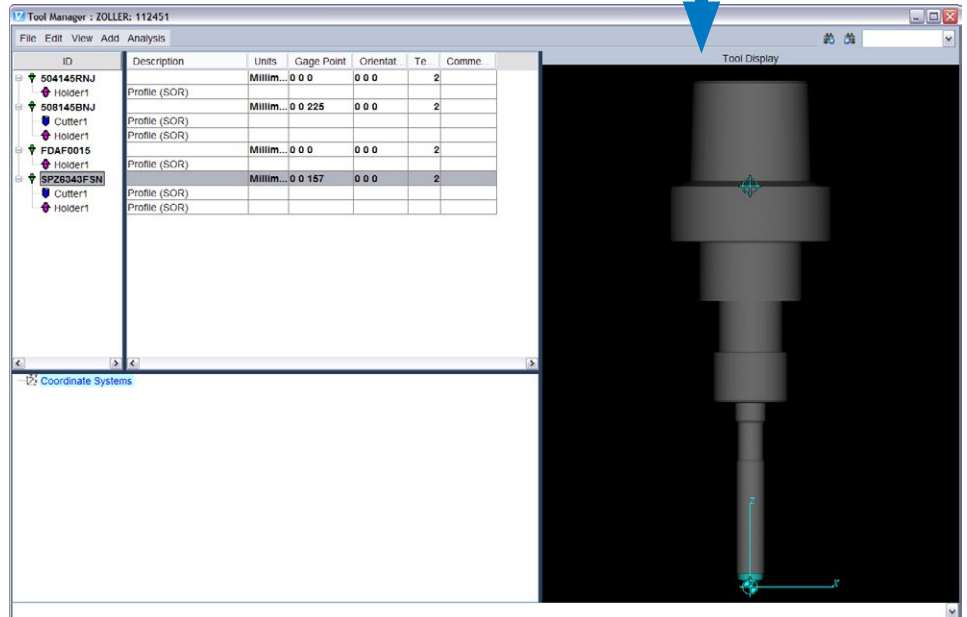

How it Works

1. Open the Interface
From VERICUT's Tool Manager, select "Import > Zoller Database"

2. Connect to TMS Database
In the Zoller Database Access panel enter the server URL. Connect and display available Setup Sheets. Select the desired Setup Sheet and tools are prepared for VERICUT.

3. Import to VERICUT
Press "OK" and the Setup Sheet tools are transferred to VERICUT for use in the simulation. It's that easy!
